Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on July 23, 2004, April 21, 2006
- 2a) ☒ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I comprising polypyrrole, polymeric sulfonic acid and trifluoromethanesulfonate in the reply filed on April 21, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 10-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 21, 2006.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-9 and 13-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 5,002,700 (Otagawa et al).

Otagawa et al disclose an electrically conductive polymer, the water-insoluble polymer having essentially permanent self-doping properties, and the polymer comprising an electrically polymerized polyaniline in covalent combination with an organic dopant having at least one sulfonic acid functional group. Suitable organic dopant include non-polymeric organic acids, reading on the presently claimed non-polymeric organic acid dopant, and polymeric acids, reading on the presently claimed colloid-forming polymeric acid.

Art Unit: 1711

In essence, the disclosure of the reference differs from the claimed invention in not expressly disclosing a combination of dopants, corresponding to the presently claimed colloid-forming polymeric acid and the presently claimed non-polymeric organic acid. It is maintained that it would have been obvious to one having ordinary skill in the art to have employed a mixture of dopants, reading on said presently materials, for their expected additive effect. Accordingly, absent evidence of unusual or unexpected results, no patentability can be seen in the presently claimed subject matter.
